### **DETAILED ACTION**

This office action is in reply to applicant's arguments filed on 07/01/2008. Claims 15-28 are pending in the application.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

the claimed invention is directed to non-statutory subject matter. Claims 15-28 recite steps that do not provide any transformation. Furthermore, the specification describes the self help wizard as a software "Another well known convention used to empower customers is commonly referred to as a self-help wizard. A self-help wizard is a software application that is typically loaded on, or downloaded to a user's computer along with a related software application usually purchased by the user. Self-help wizards enable a user to configure downloaded applications (installation), customize software components, and initiate execution of accessory applications or special projects. Conventional self-help wizards such as the type accompanying downloaded software are limited, however, in that they are typically general in descriptive content and are often difficult to use effectively. These types of self-help applications are designed and intended for use on one's computer after download. Such wizards often have links to WEB-sourced information that is accessed through an Internet dialing function generic to the user's system (see specification, page 8, lines 18-28)".

. In addition, the claims also recite "an information software" that is not well defined in the spec and does not seem to be running on a hardware. Accordingly, Examiner submits that the claims are directed toward a software per se. Correction is required.
